## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Drawings*

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. The claims in the instant application are directed to the embodiment of the distractor as shown in Figs. 14-16, i.e. a distractor having a set of blades (hereinafter "double blades") associated with each jaw. Figs. 14-16 only show the double blades integrally attached to their respective jaws, such feature being recited in claim 6. However, claims 7 and 9-16 are directed to features associated with detachable blades, such features not shown in the drawings in combination with the double blades embodiment. Further, with respect to claim 5, blades of different length are not shown in combination with the double blades embodiment. Further, with respect to claim 19, the blades extending at an angle range of 20-30 degrees relative to the longitudinal axis of the distractor mechanism are not shown in combination with the double blades embodiment. Therefore, the limitations recited in claims 5, 7, 9-16, and 19 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

Art Unit: 3731

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 5, 7, 9-16, and 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. See explanation above with respect to the objection to the drawings.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4, 6, 17, 18, and 20-22 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Ray (WO 98/34552). Figs. 6, 7, and 8B of Ray show a distractor device having all the limitations as recited in claims 1-4, 6, 17, 18, and 20-22, including: first and second handles 25; first and second jaws 22, the jaws including at least one curved portion (see area of 33 in Fig. 8B); first and second sets of spaced, integrally attached blades 32, the tips of the blades being curved, thus "including at least one curved portion" (see Fig. 8B); and a distractor mechanism 26-29.

***Allowable Subject Matter***

Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
